## 1.Uvod

### 1.1 Korišćeni programski jezici

Za izradu sajta je korišćen programski jezik Javascript, njegova biblioteka JQuery , HTML, CSS i XML. Sajt je rađen u Visual studio codu.

### 1.2 Opis funkcionalnosti

- Sajt je responsive i kod je samostalno napisan, nije korišćen framework
- Promena pozadine header-a prilikom skrolovanja
- Menu u header-u je dinamički ispisan AJAX-om i to kao objekat iz JSON file-a
- Provera podataka na index strani koja se vrši regularnim izrazima
- Klikom na linkove u meni-u, odlazi se na odredjeni deo strane ili se otvara nova stranica
- Klikom na dugme **SEND**, proveravaju se podaci I ukoliko su odgovarajući prosledjuju se
- Svi proizvodi, kao i njihovi opisi(model, color, price) ipsisani su AJAX-om kao podaci iz JSON file-a
- Proizvodi se klkikom na Sort(padajuća lista) mogu sortirati po opadajućoj ili rastućoj ceni u zavisnosti od potrebe korisnika
- Proizvodi se takodje mogu filtrirati klikom na odgovarajući checkbox I time će se prikazati odgovarajući model telefona
- Klikom na dugme **add**, proizvod se dodaje u korpu, izlazi obaveštenje kao potvrda da je proizvod dodat I korpu
- Prikaz proizvoda koji je dodat u korpu, moze se videti klikom na **Chart**
- Na **Chart** stranici, prikazuje se izabran model, cena, kolicina I ukupna cena za izabrane proizvode
- LocalStorage je korišćen za čuvanje podataka na korisničkoj strain kao I za dodavanje proizvoda u korpu
- Klikom na sliku, koja se nalazi na strainici author.html prikazuje se ime autora.

### 1.3 Template

Template za izradu sajta nije korišćen, već je kod samostalno napisan

## 2. Organizacija

### 2.1 Organizaciona šema

Sve stranice sajta su dostupne sa svake stranice sajta. Ne postoje stranice kojima nije moguće pristupiti sa neke od stranica sajta.

### 2.2 Mapa sajta

```
